

Steve Easley

Principal, Steve Easley & Associates

Steve Easley is an internationally recognized construction consultant specializing in solving building science related problems and educating building industry professionals and their trade partners. His work focuses on increasing quality of construction, sustainability and reducing costly mistakes that lead to construction defects and call backs. Services provided include job site quality analysis, design review, educational seminars, mediation and product consulting.

Steve is nationally known for his cost effective, practical approaches to building high performance structures and quality assurance. Steve's mission is helping industry professionals build & remodel structures that are durable, energy efficient, healthy and comfortable to live and work in.

He has more than 30 years of industry experience. He has performed thousands of jobsite quality surveys and presented numerous building science seminars to construction professionals around the world with an annual audience of 8-10,000 industry professionals. He is a frequently requested speaker because of his practical approach to building science, his dynamic speaking style and his unique ability to explain complex concepts in simple terms that can be integrated into practice. Steve speaks regularly for these and other professional organizations and conferences.
